

IH500 based Genesis

Industrial Printer Software

Genesis Printer software facilitates fully stand-alone or networked operation of robust industrial Printers and Printer and Scale combinations.

Supporting the on-Printer software is the choice of one of three PC based software packages; Genesis Lite, Genesis Lite Plus and Genesis Pro. Between them they cover a range of user requirements from a single workstation start-up facility to a fully networked factory control system.

GENESIS PC SOFTWARE

MODULE

OCM SET UP MODULE

No. of printers supported

No. of departments supported

Weight Banding Tables

Hotshot Keyboard Option

LABEL DESIGN MODULE

PLU EDITOR MODULE

OPERATION MODULE

No. of simultaneous printer connections

Printer Download (Serial or Ethernet)

Production Data collection from printer

REPORTS MODULE

	LITE	LITE PLUS	LITE PRO
	Y	Y	Y

Module Overview

OCM SETUP MODULE

Configures PC Software and Serial/Network Connections
Configures Number, Type and Functionality of Printers and Scales
Configure Departments
Create and edit Weight Banding Tables
Create and edit PLU Hotshot Schemes

LABEL DESIGN MODULE

Create and edit label templates

PLU EDITOR MODULE

Create and edit PLUs

OPERATION MODULE

Displays connected printer status
Facilitates download of Setup, PLU and Label Template data to printers
Collects production data from networked printers
Displays 'Live' production data

REPORTS MODULE

Configurable user reports
Full (every transaction) or Summary (totals only) report
Report data can be displayed, printed or exported to CSV file

Technical Specification (Fully refurbished 2nd user)

Genesis Printer Software

Below functionality is dependent on the exact configuration of the Printer:

- User ID Log-on and Off
- Individual Transaction and Batch Number Traceability
- Select PLU or Weight Banding Table
- Communication of Tare & Min & Max target weights with scales
- Stable, on-Target scale weights can automatically trigger print of label
- One key-press Hotshot PLU keyboard option
- Multi-level batching operations

Local printer Settings

The IH500 Based Genesis system can be configured with compact & HCL load units in capacities from 3kg to 100kg and incorporate the following Intermec Printers;

PF4i
PM4i
PX4i
PX6i
PM43c
