

# Octopus

## Weigh Label and Data Capture System

Industrial PC based system for weighing, labelling products and recording production data.

Equipment manufactured in Holland by VWS Nederland.

The industrial touch screen provides easy operation and a consolidated view of all relevant data.

A number of supporting software modules are available to suit different customer applications. The software is designed to be connected to a network and can be linked to high level ERP or other information systems.

The system is constructed from stainless steel and can be equipped with different types of scales, and multiple barcode label printers to generate pack, crate and pallet labels.

Wireless barcode scanners are available for recording data from products which already have a barcode.

### Options

- Network version
- Link to ERP or other information system
- Control for multiple printers for packing / crate and pallet labels
- Various weighing ranges
- Industrial barcode scanner
- Printer to print weighing results

### Technical Specification - Octopus

- Stainless steel construction
- Industrial touch screen for easy operation
- Weighing scale 30kg / 10g (other ranges available)
- PC integrated weighing interface
- Industrial barcode label printers for barcode print
- Software for accessing orders
