

Octopus Ace

Automatic Weigh Price Labelling System

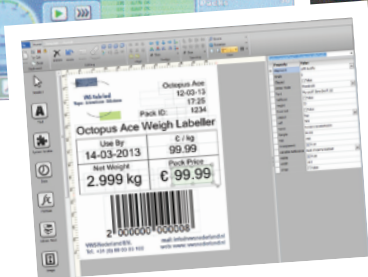

Innovative software combined with the most advanced weighing and printing technologies ensure the Octopus Ace fully meets the processing requirements of today and in the future.

Equipment manufactured in Holland by VWS Nederland.

Features

- Advanced Electromagnetic Force Restoration (EMFR) weighing technology
- User friendly 19" 'Icon driven' touch screen
- Label and product images on screen
- GS1 DataBar and Ingredient declarations in accordance with the latest statutory labelling requirements
- Label design Background Image Support (BIS)
- Full product traceability
- Windows True Type Fonts
- Nexus label design software
- Open interface (XML) for linking with ERP systems
- Large label reel holder with capacity up to 300mm diameter

Pack Ranges (Standard configuration)

(400mm weight conveyor length)
 Pack length from 80mm to 300mm
 Pack width from 50mm to 280mm
 Pack height from 5mm to 180mm

(Other configurations available on request)

Label Dimensions (Standard configuration)

Length from 35mm to 100mm
 Width from 35mm to 100mm

(Other configurations available on request)

Weight Range

0.5g x 1500g
 1g x 3000g
 2g x 6000g

(Other configurations available on request)

- Modular design and full stainless steel construction
- Advanced Electromagnetic Force Restoration (EMFR) weighing technology for accurate weighing up to 120 packs per min.
- Supports multiple top and base printer(s) with advanced, proven, print and apply technology
- Removable conveyors for easy cleaning
- Variable belt speeds programmable by product
- User friendly 19" 'Icon driven' touch screen to call up relevant product and operational information
- Label and product images are displayed per product on screen for quality assurance purposes
- Traceability by pack number, product, lot, user and machine ID
- Machine status, production rates, totals and diagnostics directly accessible on screen
- Configurable access control and language preferences by user
- Linking with (ERP) systems through an open interface using the latest (XML) technology
- Fully integrated NEXUS label formatting software including:
 - Background Image Support (BIS), label image files or scanned labels can be used as a background to assist with label design
 - Various editing tools to assist label design
